

FARMERS MARKET ON WHEELS

Farm to Table is offered in conjunction with our wellness program, Pathways to SmartCare.

The goal of this program is to provide opportunities for healthy eating, which includes providing access to local food producers.

WE BRING THE FARMERS MARKET TO YOU!

Provide convenient healthy eating opportunities for your workplace: give employees a farmers market during their work day at your own location. This year-round program provides seasonal locally grown produce, dairy products, meats and other local fare. Pre-ordering is encouraged or employees may simply pay for their purchases that day. All of the farms we work with are certified by the Department of Agriculture.
